Notes:

At The Private Practice at Burton IVF Ltd we process blood tests via The Doctors Laboratory (TDL), the largest independent provider of clinical laboratory diagnostic services in the UK. This medically led laboratory was established in 1987 and provides both rapid and efficient return of results. Our choice of support services is based on our aim to provide our patients with the best available service at all times.

Patients are treated as individuals and therefore the range of tests required for each person may differ. For this reason we provide individually priced list of tests to enable patients to see what their investigations will cost in advance. In addition we have a range of pre treatment screening packages which reflect discount for a bundle of tests.

The cost of your blood test includes the taking of the blood, the processing of the investigation and the provision of detailed reports. We recommend that all patients are seen for review when their results are available, to ensure explanation and an opportunity for related treatment recommendations to be made.

Results are received promptly back to our coordination office for processing and reconciliation with your personal records, you can contact us for further information at info@burtonivf.com

Payment for blood tests is required at the time of testing and may be made by either cash or cheque.

All cheques made payable to **The Private Practice at Burton IVF Ltd**

*Semen analysis is arranged via the Laboratory Service at BCRM and is on a pre-arranged appointment basis. The investigation charge is £200.00 per analysis with payment made directly to Burton Hospitals NHS Foundation Trust. Payment for semen analysis may be made by cheque, cash, debit or credit card (2% handling charge for credit card payments).

If appropriate and not previously addressed, investigation of fallopian tubes will be discussed with you at the time of your consultation, the most appropriate tubal patency method will be recommended. If there is a recommendation for surgical intervention an individual quotation will be provided.

We are able to offer an extensive range of investigations, if you cannot see the test required on our fee list please contact us directly at info@burtonivf.com
